

PROJECTIONS IS HERE!

Glance into your client's future with today's data

5 Years of Projections

Based on existing tax returns or financial statements, you can generate up to five years of projections.

4 Projection Methods

Choose the historical data you wish to use and pick one of four methods for generating your projections.

Unlimited Scenarios

Generate and customize an unlimited number of projection scenarios and compare them side by side.

Customize Your Projections

35 projection variables can be modified based on your selected criteria.

Some of these include:

- | | |
|---|---|
| <input checked="" type="checkbox"/> Sales Growth % | <input checked="" type="checkbox"/> Receivables Turn Days |
| <input checked="" type="checkbox"/> Payables Turn Days | <input checked="" type="checkbox"/> Interest Bearing Debt (IBD) % |
| <input checked="" type="checkbox"/> Inventory Turn Days | <input checked="" type="checkbox"/> Gross Margin |

Most balance sheet & income statement values can also be modified and recalculated.

Choose Your Cash Flow Model

All cash flows and reports from BTA Pro are available in projections.

BTA Pro now has Projections!

Bukers BTA Pro now gives you the ability to forecast your client's business cash flow based on their historical data.

Best of all, there's no charge for the new projections module with Bukers BTA Pro licensing.

For More Information and a Demo

Once licensed, ensure your users maximize their use of this powerful tool with free and unlimited training and support.
